Utilities

Enterprise Resource
Planning PaaS Interfaces

Business Challenge

- **Reporting Limitations** - Finance team struggled with inflexible E-Business Suite reporting tools that did not sufficiently support the business
- **Changing Business Structure** - After a divestiture, company's on-premise solution did not optimally meet the needs of the organization for scalability and flexibility

Solutions

- **Oracle ERP Cloud** - Digitally transformed business using GL, AP, Fixed Assets, and Cash Management modules along with an Oracle PaaS interface platform
- **Peloton Hybrid Delivery** - Mix of on-site US-based resources and expertise from Peloton's Global Delivery Hub optimized ability to execute and reduced project cost
- **Oracle PaaS Interfaces** - Line of business applications and ERP Cloud successfully integrated using Oracle's PaaS interfaces

Impact

- **Improved Invoicing Process** - Previous invoice imaging process and application replaced with more streamlined, automated approach
- **Enhanced Scalability and Flexibility** - Move to the cloud led to a system and process that better supports the changing dynamics of the business and allows for future customization
- **Superior Reporting Capabilities** - Better integration and more detailed data availability allows the business to look at performance through multiple lenses and derive important insights to make key management decisions
