

Alcoa Live with Integrated Business Planning & Execution Foundation  
Enabling Better Decision Making

FOR ORACLE INTERNAL USE ONLY

Industry: Manufacturing

Alcoa | Pittsburgh, PA | [www.alcoa.com](http://www.alcoa.com)

Products Purchased: Oracle EPM Cloud

Systems Replaced: Hyperion On Premise

Integrations: Global Data Warehouse (GDW)

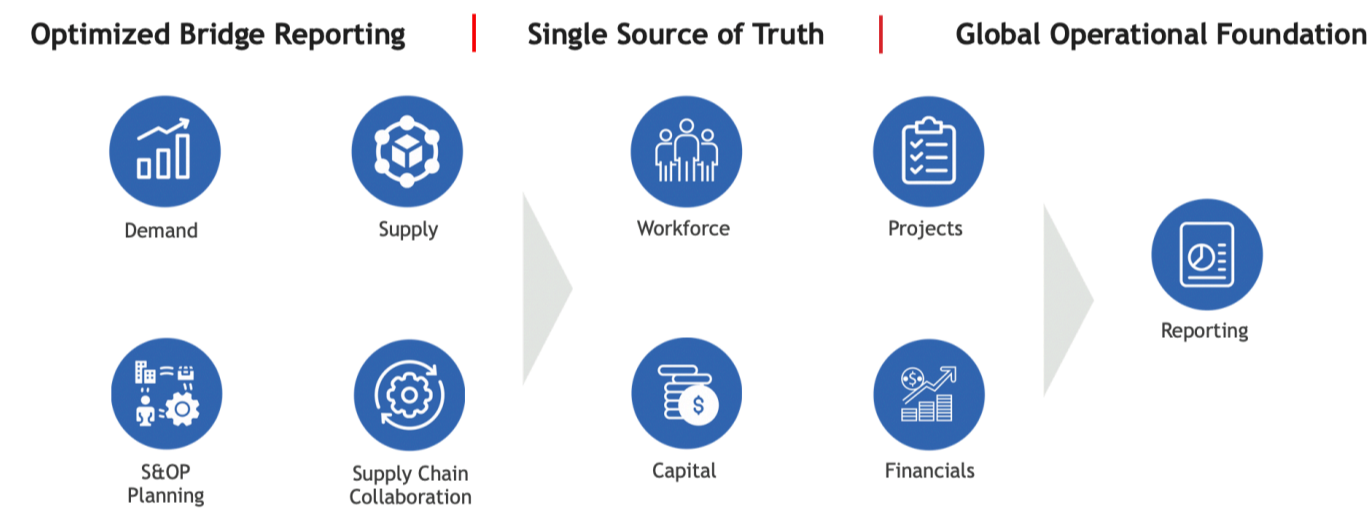

Founded in 1888, Alcoa Inc. is a global industry provider in bauxite, alumina and aluminum products. The company is active in major aspects of aluminum production including technology, mining, refining, smelting, fabricating, and recycling.

Oracle EPM Cloud - Solution & Key Accomplishments

Alcoa's Legacy Hyperion on-prem environment could no longer scale with the business and became manually intensive, entering data multiple times into multiple systems, requiring additional reconciliation and validation processes.

The EPM Cloud solution reduced 15 On-Prem cubes to 5 Integrated Cloud cubes, establishing the IBPX solution foundation for Alcoa's connected planning journey. This new foundation provided the following benefits:
