Oracle TSS - Analytics Go Live

STP
Nuclear Operating Company

Industry: Energy
STP Nuclear Operating Company | Wadsworth, TX | **www.stpnoc.com**
Products Purchased: Oracle TSS - Analytics
**Systems Replaced:** Hyperion BRIO

STP Nuclear is one of the newest and largest nuclear power facilities in the nation. STP's two units produce 2,700 megawatts of carbon-free electricity, providing clean energy to two million Texas homes. 1,200 employees maintain an ongoing commitment to the safe and reliable operation of the facility.

Oracle Analytics Cloud - Solution & Key Accomplishments

STP Nuclear had been lacking a unified approach with no central reporting or analytics framework for key operational metrics. This led to an extensive effort required to collect data and manually build out reports while quality and integrity issues occurred. STP Nuclear partnered with Peloton Consulting Group to deliver Oracle Analytics Cloud (OAC) as the front-end data analysis and visualization tool. By implementing the solution, STP was able to develop a framework to ensure roll-out strategy for long-term adoption and introduce data stewardship into the organization, providing consistency and accuracy of data.

The following benefits were achieved as a result of the project:

Embedded machine learning & natural language processing to support growth

Constructed interactive OAC dashboards that display the latest data based on roles

Simplified reporting with built-in & trackable data preparation & enrichment
