Industry: Retail - Fast Casual Restaurant
Portillo's Restaurant | Oak Brook, IL | www.portillos.com
Products Purchased: Oracle Cloud ERP, SCM & EPM
System Integrations: Aloha Point of Sale, UKG

Portillo's, an American fast casual restaurant chain based in the Chicago area, is best known for its Chicago-style hot dogs, Italian beef sandwiches, char-grilled burgers, fresh salads and famous chocolate cake. Portillo's operates 80+ restaurants in 10 states as well as two manufacturing and warehouse facilities.

Oracle Cloud Business Drivers

As Portillo's continues to expand their national footprint with new store openings, they recognized the need for a single enterprise ERP to support their growth. The legacy tools supporting Portillo's business required significant manual processes, including disparate systems for accounting and manufacturing. Compelled to transform Portillo's business, leadership envisioned a fully integrated set of processes to drive higher accuracy, real-time insights, and allow for more in-depth analytics.

To support Portillo's digital transformation goals, Peloton successfully implemented Oracle Cloud ERP, SCM, and EPM. As a result, Portillo's achieved the following:

- Superior reporting & analytics, reducing errors & driving informed decision making
- Integrated, real-time view of manufacturing, finance & operations
- Scalable platform with the ability to reach 800+ locations

Stay in the Know with Peloton Consulting Group

Transitioning to the cloud unlocks opportunities to streamline operations, enhance scalability, and foster continuous innovation. Regardless of where your client is on their cloud journey, Peloton Consulting Group can help them assess opportunities, plan their implementation, and transition their applications to the cloud.
