Peloton CONSULTING GROUP **+ ORACLE**

Leading Specialty Retailer Successfully Migrates from Hyperion to Oracle Cloud EPM

Oracle Cloud EPM Go Live

TAILORED BRANDS

Industry: Retail
Tailored Brands | Houston, TX | www.tailoredbrands.com
Products Purchased: Oracle Cloud EPM - Planning , Enterprise Data Management, Financial Consolidation & Close
Systems to be Replaced: Oracle Hyperion

Tailored Brands, Inc. is a specialty retailer of men's suits and formalwear in the United States and Canada. Their brands include Men's Wearhouse, Jos. A. Bank, Moores Clothing for Men and K&G Fashion Superstores.

Cloud EPM Business Drivers

Tailored Brands had been running their data management, planning, close and reporting processes with an on-premise solution that could no longer keep up with the demands of their business growth. They needed an automated solution that would replace the existing data integration (FDMEE) and metadata (DRM) solutions with EDM for an integrated data management solution focused on streamlining and automating all data management related activities. Tailored Brands also focused on improving the planning and reporting process by leveraging best practice-based business process improvements from Peloton's Retail Fit-to-Modern playbook.
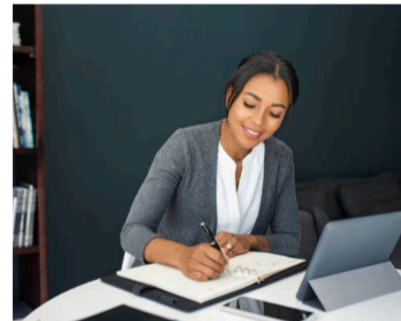

Peloton Consulting Group partnered with Tailored Brands to deliver an Oracle Cloud EPM solution. As a result of the implementation, Tailored Brands achieved the following benefits:

Simplified 20+ reporting cubes to 4 cubes by redesigning the previous architecture

Systematized master data management & data governance across all platforms

Implemented drill through capabilities from FCC into PeopleSoft FS Transaction detail

Stay in the Know with Peloton Consulting Group

Peloton Consulting Group will be hosting an Interval Training focused on Oracle Digital Assistant on June 18th at 9:00am PST. In this month's training, attendees will learn how to:

- Role-Based Security Basics
- How to create a user and assign roles
- How to provision Data Access
- Best Practices for customizing and modifying roles
- Security and Audit Reporting
