Top 5 Reasons to Migrate From E-Business Suite and JD Edwards to Oracle Cloud Fusion Applications

Peloton CONSULTING GROUP | **Digital Transformation Realized.**

As businesses face growing demands for agility, scalability, and innovation, many are moving from legacy on-premises systems like Oracle E-Business Suite (EBS) and JD Edwards (JDE) to Oracle Cloud Fusion Applications. By migrating to the cloud, organizations unlock modern functionality, enhanced user experiences, and significant cost efficiencies that drive business transformation and long-term success.

Why Move to the Cloud?

Cloud technology offers substantial advantages over on-premises systems, enabling organizations to:

- **Reduce Costs:** Eliminate hardware, maintenance, and upgrade expenses.
- **Gain Scalability:** Quickly adapt to growth or changing business needs.
- **Improve Agility:** Enable faster decision-making with real-time insights.
- **Enhance Innovation:** Leverage continuous updates and emerging technologies like AI and machine learning.
- **Boost Security:** Benefit from Oracle's best-in-class cloud security infrastructure.

Top 5 Reasons to Migrate from EBS and JDE to Oracle Cloud Fusion Applications

1. **Eliminate Upgrade Headaches**
   - Legacy systems like EBS and JDE require costly and time-consuming upgrades to stay current.
   - Oracle Cloud Fusion Applications eliminates the need for manual upgrades with automatic quarterly updates, and on demand environment copies, ensuring your system is always up to date.

2. **Future-Proof Technology**
   - Oracle Cloud Fusion offers cutting-edge features such as AI-driven automation, machine learning insights, and advanced analytics.
   - Stay ahead of industry trends with continuous innovations built directly into the platform.

3. **Unified, Scalable Platform**
   - Oracle Cloud Fusion Applications provide a single, integrated platform that spans ERP, HCM, SCM, and CX.
   - Avoid data silos and achieve seamless workflows across your organization, ensuring scalability as your business grows.

4. **Real-Time Insights and Analytics**
   - Legacy systems often rely on outdated reporting tools or disconnected data sources.
   - Oracle Cloud delivers real-time analytics powered by Oracle Analytics Cloud, providing instant, actionable insights to drive better decisions.

5. **Lower Total Cost of Ownership (TCO)**
   - Eliminate costs associated with on-premises hardware, storage, and IT maintenance.
   - Oracle Cloud's subscription-based model reduces upfront investments while providing predictable, lower ongoing costs.

Key Benefits of Oracle Cloud Fusion Applications

- **Continuous Innovation:** Quarterly updates deliver the latest features and capabilities without disruption.
- **Enhanced User Experience:** Oracle's Redwood design provides intuitive, user-friendly interfaces.
- **Built-in AI and Machine Learning:** Automate repetitive tasks, improve accuracy, and uncover insights faster.
- **Integrated Ecosystem:** Unified applications across ERP, HCM, and SCM ensure seamless processes and eliminate silos.
- **Security and Compliance:** Benefit from Oracle's robust security framework, ensuring data protection and compliance with industry regulations.
- **Global Reach and Scalability:** Support multi-currency, multi-entity, and global operations with ease.

Common Challenges with Legacy Systems

E-Business Suite (EBS) and JD Edwards (JDE):

- **Complex Customizations:** Customizations in legacy systems often lead to upgrade delays and high costs.
- **Limited Scalability:** On-premises systems struggle to adapt to evolving business needs.
- **Manual Processes:** Legacy solutions require significant manual effort, reducing efficiency and increasing errors.
- **Outdated Technology:** Lack of advanced AI, predictive analytics, or mobile capabilities.
- **Costly Maintenance:** High costs for hardware, security, and system support.

Oracle Cloud Fusion Applications address these challenges by providing a modern, cloud-based solution that is flexible, scalable, and innovative.

Why Choose Peloton for Your Migration?

At Peloton Consulting Group, we help connect people, processes, and technology to drive successful digital transformations. We pride ourselves on delivering the best possible customer experience through a unique balance of innovative and collaborative approaches. Using our "Fit to Modern" and "Breakaway" methodologies, we empower organizations to drive adoption and change, ensure results, and mitigate risk throughout every phase of their digital transformation journey.

Our Proven Approach Includes:

- Comprehensive assessment and tailored migration plans.
- Data migration and validation with minimal disruption.
- Process optimization to fully leverage Oracle Cloud's capabilities.
- User training, change management, and post-go-live support.
- Accelerated timelines to deliver quick time-to-value.

Conclusion

Migrating from EBS and JDE to Oracle Cloud Fusion Applications is a critical step toward modernizing your business and staying competitive in today's fast-paced environment. By embracing Oracle's cloud platform, you'll unlock innovation, scalability, and efficiency while reducing costs and future-proofing your organization.

About Peloton Consulting Group

Peloton Consulting Group has the vision and connected global capabilities to help organizations envision, implement, and realize the benefits of digital transformation. Our team has the best practices, knowledge, industry expertise, and know-how. We make digital transformation a reality by leveraging Enterprise Performance Management (EPM), Enterprise Resource Planning (ERP), Supply Chain Management (SCM), Human Capital Management (HCM), Customer Experience (CX), Analytics, and Data Management for the cloud. Through connected capabilities, we bring people, processes, and technology together. We help organizations go further, faster. That is the Peloton way!
